MD SOHANUZZAMAN SHANTO

Rajshahi, Bangladesh | +880 1774 786 111 | md.sohanuzzaman@proton.me | LinkedIn | GitHub | Portfolio | TryHackMe

Education

Wuhan Institute of Technology — Wuhan, China

Bachelor of Engineering in Computer Science and Technology — *Feb 2022 Jan 2026*

- Grade: 84% | Awards: First Class Scholarship for Academic Excellence (Ranked 1st in batch, 2025)

Experience

Security Operations Center Analyst — Dhaka, Bangladesh

Smartdata Technologies Limited — *Oct 2026 Present*

- Deployed Stellar Cyber Open XDR for customer environments; integrated telemetry and tuned detections to improve threat visibility and alert fidelity.
- Installed and configured Paraqum bandwidth shaper at Rupali Bank, implementing traffic policing and QoS policies to control utilization and prioritize business-critical flows.
- Monitored and triaged security alerts across SIEM and XDR platforms; investigated incidents, documented findings, and escalated per response playbooks.
- Documented deployment procedures, network topology, and configuration baselines for handover and operational support.

Technical Skills

SIEM & Log Analysis: Security Monitoring, Threat Detection, Incident Response, Log Analysis, Malware Analysis, Network Security, Vulnerability Assessment, MITRE ATT&CK

Security Tools: Stellar Cyber Open XDR, Paraqum Bandwidth Shaper, Splunk (SPL), Elastic Stack (KQL), Wazuh, Suricata, Sysmon, Zeek, Wireshark, Burp Suite, Nmap, PEStudio, VirusTotal, Active Directory

Operating Systems: Windows, Linux

Programming: Python, Bash, SQL

Machine Learning: Scikit-learn, TensorFlow, Ensemble Learning, SHAP

Virtual Internships & Training

SOC Analyst Training | *TryHackMe (SOC Level 1 Track)* | Certificate — Mar 2026

- Investigated simulated security incidents in Splunk/ELK/Wazuh; triaged alerts and analyzed endpoint telemetry on Windows/Linux.
- Analyzed network traffic and endpoint telemetry to identify indicators of compromise.
- Conducted malware investigations and incident response exercises; documented findings using industry-standard workflows.

Mastercard Cybersecurity Analyst Simulation | *Forage* | Certificate — Jun 2026

- Designed phishing simulation campaigns and analyzed employee susceptibility data, identifying high-risk cohorts.
- Developed targeted security awareness training recommendations to improve phishing resilience.

Projects

SIEM Home Lab | *Wazuh, Suricata, Sysmon, Kali Linux* | GitHub — 2026

- Built 3-VM SOC lab (Wazuh, Sysmon, Kali) on isolated NAT network; deployed File Integrity Monitoring across system folders with real-time alerting.
- Simulated 15+ attack scenarios (Hydra, PowerShell, Nmap) and mapped detections to 20+ MITRE ATT&CK techniques with custom Wazuh rules.
- Configured Suricata IDS and built dashboards for alert triage and incident investigation.

SafeLine WAF HomeLab | *Safeline WAF, DVWA, Kali Linux* | GitHub — 2026

- Deployed Safeline WAF in reverse-proxy mode protecting DVWA; validated against SQL Injection, XSS, and Brute-Force attacks with zero false positives.
- Configured detection policies and rate-limiting rules; performed log analysis to tune false positives and documented topology.

Research Experience

Undergraduate Thesis: Explainable PE Malware Detection | **GitHub** 2024 - 2026

Wuhan Institute of Technology *EMBER2024 Dataset*

- Developed an ensemble stacking pipeline for PE malware classification trained on the EMBER2024 dataset, achieving 95%+ accuracy across 1M+ samples.
- Applied SHAP to produce model-agnostic explanations and feature-level attributions, improving analyst interpretability and reducing investigation time.

Certifications & Licenses

SOC Level 1 Certificate *(TryHackMe)* | *Mar 2026* Verify

Google Cybersecurity Professional Certificate *(Google / Coursera)* | *Sep 2025* Credly badge

Google IT Support Professional Certificate *(Google / Coursera)* | *Nov 2025* Credly badge

Languages

English — C1 (TOEFL 103/120) | **Bengali** — Native
