EDUCATION

Wuhan Institute of Technology

Wuhan, China

Bachelor of Engineering in Computer Science and Technology

Feb. 2022 – Jan 2026

- Grade: 84% — Awards: First Class Scholarship for Academic Excellence (Ranked 1st in batch, 2025)

TECHNICAL SKILLS

Security: Security Monitoring, Threat Detection, Incident Response, Log Analysis, Malware Analysis, Network Security, Vulnerability Assessment

Security Tools: Splunk, Elastic Stack (ELK), Wireshark, Zeek, Wazuh, Sysmon, Burp Suite, Nmap, PESTudio, VirusTotal

Operating Systems: Windows, Linux, Active Directory

Programming: Python, Bash, SQL

Machine Learning: Scikit-learn, TensorFlow, Ensemble Learning, SHAP

VIRTUAL EXPERIENCE & PROJECTS

Mastercard Cybersecurity Job Simulation — Forage

June 2026

Remote

- Simulated the role of a Mastercard Security Analyst to design and launch realistic, company-wide phishing simulation drills.
- Analyzed employee vulnerability data to identify high-risk departments and security gaps across the enterprise.
- Developed targeted corporate security awareness training materials based on data insights to mitigate future phishing risks.
- Forage certificate

RESEARCH EXPERIENCE

Undergraduate Thesis: Explainable PE Malware Detection

Wuhan Institute of Technology

EMBER2024 Dataset

2024 – 2026

- Developed an ensemble stacking pipeline for PE malware classification trained on the EMBER2024 dataset (1M+ samples).
- Applied SHAP to produce model-agnostic explanations and feature-level attributions to improve analyst interpretability and debugging.

GitHub: <https://github.com/Sohanuzzaman3301/pe-malware-ensemble/>

PROJECTS

Password Strength Meter | Astro, JavaScript, CSS

2024

- Client-side password strength estimator and leak checker that estimates entropy and likely crack times using a zxcvbn-inspired approach.
- Performs k-anonymity "Have I Been Pwned" leak checks entirely from the browser so plaintext passwords are never transmitted; includes CI for deployment to Cloudflare Pages.

GitHub | Live

SOC Level 1 Certificate

Mar. 2026

TryHackMe

- Performed security monitoring, alert triage, incident investigation, and threat detection in simulated SOC environments.
- Utilized Splunk, Elastic Stack (ELK), Wireshark, Zeek, Sysmon, and Wazuh for log analysis, network monitoring, and endpoint investigations.
- TryHackMe certificate

Google Cybersecurity Professional Certificate

Sep. 2025

Google / Coursera

- SIEM monitoring, incident response, network traffic analysis, Python automation, and NIST security frameworks.
- Credly badge

Google IT Support Professional Certificate

Nov. 2025

Google / Coursera

- System administration, Active Directory, networking, and IT infrastructure troubleshooting.
- Credly badge
