

MD SOHANUZZAMAN SHANTO

Dhaka, Bangladesh | +880 1774 786 111 | md.sohanuzzaman@proton.me | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [TryHackMe](#)

EDUCATION

Wuhan Institute of Technology

Bachelor of Engineering in Computer Science and Technology

Wuhan, China

Feb 2022 – Jan 2026

- Grade: 84% — Awards: First Class Scholarship for Academic Excellence (Ranked 1st in batch, 2025)

TECHNICAL SKILLS

SIEM & Log Analysis: Security Monitoring, Threat Detection, Incident Response, Log Analysis, Malware Analysis, Network Security, Vulnerability Assessment, MITRE ATT&CK

Security Tools: Splunk (SPL), Elastic Stack (KQL), Wazuh, Suricata, Sysmon, Zeek, Wireshark, Burp Suite, Nmap, PESTudio, VirusTotal

Operating Systems: Windows, Linux, Active Directory

Programming: Python, Bash, SQL

Machine Learning: Scikit-learn, TensorFlow, Ensemble Learning, SHAP

CYBERSECURITY EXPERIENCE

SOC Analyst Training | *TryHackMe (SOC Level 1 Track) (Certificate)*

Mar 2026

- Investigated simulated security incidents using Splunk, Elastic Stack (ELK), Sysmon, Zeek, and Wazuh.
- Performed alert triage, threat detection, and log analysis across Windows and Linux environments.
- Analyzed network traffic and endpoint telemetry to identify indicators of compromise.
- Conducted malware investigations and incident response exercises using industry-standard workflows.

Mastercard Cybersecurity Analyst Simulation | *Forage (Certificate)*

Jun 2026

- Designed phishing simulation campaigns and analyzed employee susceptibility data to identify high-risk cohorts.
- Identified security awareness gaps and recommended mitigation strategies to reduce organizational risk.
- Developed targeted security awareness training recommendations to improve phishing resilience.

PROJECTS

SIEM Home Lab | *Wazuh, Suricata, Sysmon, QEMU/KVM, Kali Linux* | [GitHub](#)

2026

- Built multi-VM SOC lab (Wazuh Manager on Ubuntu, Windows 10 endpoint with Sysmon, Kali attacker host) on isolated NAT network via QEMU/KVM.
- Deployed File Integrity Monitoring across `/etc`, `/var/www/html`, and Windows system folders with real-time alerting in Wazuh dashboard.
- Simulated attacks — HTTP brute-force (Hydra), encoded PowerShell payloads, Nmap scanning — and mapped detections to MITRE ATT&CK techniques.
- Created custom Wazuh detection rules (`local_rules.xml`) with severity tuning; configured Suricata IDS and built dashboards for alert triage and incident investigation.

SafeLine WAF HomeLab | *QEMU/KVM, Safeline WAF, DVWA, Kali Linux* | [GitHub](#)

2026

- Designed and deployed an isolated virtual lab (QEMU/KVM, NAT networking) with Safeline WAF in reverse-proxy mode protecting a DVWA target.
- Validated WAF effectiveness against SQL Injection (sqlmap), Reflected XSS, and Brute-Force (hydra) attacks launched from Kali Linux — all malicious traffic blocked with zero false positives.
- Configured detection policies, rate-limiting rules, and performed log analysis to tune false positives; documented full topology, setup guide, and attack evidence with screenshots.

Password Strength Meter | *Astro, JavaScript, CSS* | [GitHub](#) | [Live](#)

2024

- Client-side password strength estimator and leak checker that estimates entropy and likely crack times using a `zxcvbn`-inspired approach.
- Performs k-anonymity "Have I Been Pwned" leak checks entirely from the browser so plaintext passwords are never transmitted; includes CI for deployment to Cloudflare Pages.

RESEARCH EXPERIENCE

Undergraduate Thesis: Explainable PE Malware Detection GitHub	2024 – 2026
<i>Wuhan Institute of Technology</i>	<i>EMBER2024 Dataset</i>
- Developed an ensemble stacking pipeline for PE malware classification trained on the EMBER2024 dataset. - Applied SHAP to produce model-agnostic explanations and feature-level attributions to improve analyst interpretability and debugging.	

CERTIFICATIONS & LICENSES

SOC Level 1 Certificate (<i>TryHackMe</i>) — <i>Mar 2026</i>	Verify
Google Cybersecurity Professional Certificate (<i>Google / Coursera</i>) — <i>Sep 2025</i>	Credly badge
Google IT Support Professional Certificate (<i>Google / Coursera</i>) — <i>Nov 2025</i>	Credly badge
